Education & Commercial

Rugby
School

EAC Network solutions were invited by Rugby School to quote for the supply and installation of 7 of the new height adjustable all-in-one Promethean AB+2 Interactive whiteboard suites. Having won the business on price and reputation we were contracted to assemble and install the new Interactive Whiteboard suites in the schools newly refurbished History building.

“EAC Network Solutions did a fantastic job, they worked with and around other contractors on site to make sure the project was completed on-time and very professionally.”

Chris Harris (Head of Audio Visual),
Rugby School
