Wycombe
Abbey School.

As the incumbent supplier and installer of Interactive Whiteboards, Wycombe Abbey School contacted us about the installation of 14 Plasma and LCD televisions that had been donated to the school for their digital signage system. After surveying each of the installation locations we sourced all of the correct mounting kits for each of the sets to be installed in their desired locations. As part of the installation we also provided a 13Amp electrical socket for each of the sets.

Installation of TV's for a Digital Signage System

“EAC Network Solutions surveyed all the locations prior to installing so it's no wonder their installations were all perfect.”

Andrew Pawlowicz (Director of ICT),
Wycombe Abbey School
